

IRG/WP 98-50101, Cannes conference 1998 proceedings

Contents:

- 50101:1 Using preservative treated timber in the built environment of the Sydney Olympic Games
H Greaves, J Norton
- 50101:2 Developing the technical guidance document on data requirements for biocidal products
P Karvinen, E Nikunen
- 50101:3 The new National Directive on wood preservation in the Netherlands
W J Homan, J K B H Kwisthout, J Dubelaar
- 50101:4 Impregnation of timber and regulations applied to preservation practice in Greece
S Adamopoulos, E Voulgaridis
- 50101:5 Tendency of the preservative use for impregnation industries in Japan
K Suzuki
- 50101:6 The waste wood situation in Germany – Legislative and practical consequences
R-D Peek
- 50101:7 Possible regulatory status of treated wood waste and implications
G Deroubaix
- 50101:8 Recycling of CCA treated wood in the US
J McQueen, J Stevens, D P Kamdem
- 50101:9 Ecotoxicological behaviour of leachates from superficially treated timber as an approach for a test strategy of environmental risk assessment in wood preservation
H-W Wegen, U-J Lucks
- 50101:10 Immunoassays for detecting and tracking wood-protecting chemicals
C Breuil, J Bull
- 50101:11 Mobility and bioavailability of wood preservation chemicals in soil – actual field measurements
S Andersen, G Rasmussen
- 50101:12 Remediation of a site contaminated with creosote and CCA – a case study
T Rødsand, K Hellum, H Lillemaehlum
- 50101:13 Remediation of a large CCA-impregnation plant
P Englöv
- 50101:14 Electrodialytic remediation of a soil from a wood preservation industry polluted by CCA
A B Ribeiro, A Villumsen, G Bech-Nielsen, A Réfega, J Vieira e Silva
- 50101:15 Occupational exposure risk assessment at a commercial treatment plant using copper azole preservative
A S Hughes, M Connell
- 50101:16 Development of wood retification process at the industrial stage
P Gohar, R Guyonnet
- 50101:17 Toxic wood preserving chemicals in the environment: Kenya – a cause for concern
R Venkatasamy

- 50101:18 Alternative technologies for wood wastes recycling
G Labat
- 50101:19 Environmental risk assessment of preservative treated wood
E F Baines, S J Davis
- 50101:20 Environmental behaviour of treated wood in (semi-) permanent contact with fresh or seawater
P Marchal, C Martin
- 50101:21 Environmental fate of copper-based wood preservatives in different soil substrates
G van Eetvelde, J M Mwangi, F Tack, R Hartmann, M Stevens
- 50101:22 Laboratory investigations about the mobility of some inorganic wood preservatives in soils
E Melcher, R-D Peek
- 50101:23 Establishment of a laboratory method to characterise the ecotoxicity of a polluted soil
P Martinet
- 50101:24 The rate of losses of creosote from power transmission poles during storage
Z Vassou, A Satanakis, C Koutsikopoulos, J Petinarakis
- 50101:25 Evaluation of fungal remediation of creosote treated wood
K Messner, S Böhmer
- 50101:26 CCA removal from treated wood by chemical, mechanical and microbial processing
C A Clausen, R L Smith
- 50101:27 Assessin health risks to occupants following remedial insectidal treatment of timber in dwellings
R J Orsler, E D Suttie, V Rijckaert
- 50101:28 Restrictions or environmental taxes as regulatory means – how will they influence the use of pressure treated wood?
F G Evans
- 50101:29 Posters
